

Kien Nguyen Dinh

Front-end Developer

📞 0774041503 ✉️ kiennghuyen0798@gmail.com 🔗 <https://github.com/nguyenkien0798> 📍 Da Nang

SUMMARY

Frontend Developer with over 4 years of experience building scalable and high-performance web applications. Experienced in ReactJS, NextJS, and modern frontend development practices. Skilled in developing responsive user interfaces, integrating APIs, and optimizing application performance. Passionate about building clean, maintainable code and continuously improving technical expertise.

EDUCATION

Duy Tân University	Oct, 2016 - Jan, 2021
Bachelor of Software Engineering	
Iviettech Center	Aug, 2022 - Jan, 2023
Major: Front-end	

WORK EXPERIENCE

Personal Projects

Front-end Developer

Intern Management System

Team size: 2

- Developed a web application to help universities and companies manage intern information.
- Participated in system research, design, and development.

Technologies: C#, JavaScript

Phone Store Application

- Developed an e-commerce web application for browsing and purchasing smartphones online.
- Built core frontend modules such as product listing, product detail pages, and shopping cart.
- Implemented state management using Redux Saga to handle asynchronous data flow.

Technologies: NextJS, Redux Saga,...

Car Rental Web Application

- Developed an e-commerce web application for car rental services including car listing, booking functionality, and payment integration.
- Integrated PayPal payment system.
- Built frontend architecture and state management.

Technologies: NextJS, Redux Saga,...

Papagroup Technology

Mar, 2022 - Aug, 2023

Front-end Developer

PGO Web Event / Admin / Landing Page

Team size: 24

- Developed admin interfaces and landing pages for a health technology platform.
- Built responsive layouts and optimized UI performance.
- Integrated GraphQL APIs and managed frontend data flow.

Technologies: NextJS, GraphQL, React Query,...

Game Configuration Admin (Boom / Fish)

Team size: 4

- Developed admin panels that allow game publishers to configure game settings.
- Implemented UI components and managed frontend logic.

Technologies: ReactJS, React Query,...

PapaHub – Game Configuration Platform

Team size: 18

- Developed frontend modules for a game configuration system that generates games based on templates.
- Built configuration interfaces for game setup and customization.
- Implemented API integration and optimized UI performance.

Technologies: ReactJS, Redux Saga, Axios, Material UI,...

Est Rouge

Aug, 2023 - Sep, 2024

Front-end Developer

SST – Ticket Sales Integration Platform (Product)

Team size: 12

- Developed frontend features for a ticket sales system integrated into promoters' official websites.
- Implemented user interfaces for ticket purchasing and management.
- Built reusable components and integrated backend APIs.

Technologies: NextJS, React Query, CMS,...

Aither – Custom Design Product Website

Customer: Aither

Team size: 6

- Developed features for a product customization website allowing users to modify product design fields.
- Implemented UI interactions and maintained website functionality.
- Fixed issues and improved system usability.

Technologies: Wordpress (ACF)

FPT IS

Oct, 2024 - Present

Front-end Developer

Procuva – E-commerce Web Application

Customer: MSB Bank

Team size: 44

- Developed frontend modules for an enterprise e-commerce platform including admin dashboard and vendor portal functionalities.
- Built responsive and reusable UI components using ReactJS to support product management, vendor product listings, and customer-facing features.
- Implemented vendor portal features allowing suppliers to submit product offers, participate in bidding processes, and manage their product information.
- Implemented digital signature functionality to support secure document approval within business workflows.

- Developed admin dashboard features for workflow management, role-based access control (RBAC), and system configuration.
- Integrated backend APIs and handled frontend data flow to ensure seamless communication between services.
- Collaborated with backend and QA teams to resolve issues and maintain system stability and performance.

Technologies: ReactJS, RxJS,...

DTTG – Government Digitalization System

Customer: Ministry of Culture

Team size: 30

- Developed and maintained frontend modules for a government digitalization system managing ethnic and religious population data in Vietnam.
- Built reusable UI components using ReactJS.
- Integrated frontend with backend APIs and handled application data flow using React state management.
- Collaborated with backend and QA teams to ensure system stability and performance.
- Investigated and fixed issues to improve system reliability.

Technologies: ReactJS, React Query,...

TECHNICAL SKILLS

Front-end	ReactJS
	NextJS
	JavaScript / TypeScript
	HTML5 / CSS3
	Redux / Redux Saga
Backend & API	RESTful API
	GraphQL
Tools	Git
	Jira
	Agile / Scrum
Other	Wordpress
	Responsive Design
	Performance Optimization

ACTIVITIES

Voluntary group of Faculty of Information Technology of Duy Tan University Oct, 2017 - Aug, 2018

Volunteers

- Participated in university volunteer campaigns such as environmental clean-up and campus maintenance.
- Supported charity programs and community activities organized by the Student Union.
- Took part in blood donation campaigns and promoted awareness of community service among students.

ADDITIONAL INFORMATION

- English – Basic working proficiency
- Hardworking and responsible
- Able to work under pressure and meet deadlines
- Strong teamwork spirit, eager to learn and share knowledge
- Friendly and sociable in team environments

HOBBIES

- Movies
- Music
- Football
